

DR-DRM4 4-Piece Drum Microphone System

A drum kit is not a single instrument. Rather, it's a collection of instruments that each has its own considerations for optimal reproduction. The DR-DRM4 System includes four microphones specifically engineered for drum applications: one Kick microphone, and three Snare/Tom microphones featuring low-profile design for minimum visibility and versatile placement options around the drum kit. Plus, the DR-DRM4 was created in a performance-matched design so that the entire kit sounds consistently great. Setting up the DR-DRM4 couldn't be easier, with integral stand mounts on each mic for quick, easy placement.

- DR-STX1 Snare/Tom mics
- 1 DR-KX1 Kick Drum mic
- 3 Snare/Tom mic mounts
- Durable carrying case with foam insert

DR-STX1 Unidirectional Dynamic Snare/Tom Microphone

- Tailored for use on snare, toms and other highly dynamic instruments
- Road-ready, all-metal construction with integral stand mount
- Compact size for maximum placement options
- Supplied with professional locking drum rim mount
- Integral XLRM-type output connector

DR-KX1 Unidirectional Dynamic Kick Microphone

- Engineered for use on kick drum
- Tuned for high-impact, low-frequency reproduction
- Durable, all-metal construction with integral stand mount
- Low-profile percussion-style design
- Integral XLRM-type output connector

Drum Mic Mounts:

Resilient microphone mounts reduce stage clutter with secure rim-mounting and versatile positioning

Case:

Durable carrying case with die-cut foam compartments and integrated handle
