

The DR-VX1 is a great-sounding, rugged, dynamic mic designed as an all-around solution for stage vocals. Using a proven capsule design, the DR-VX1 updates a classic stage mic formula with higher audio sensitivity and a smoother frequency response than the “old faithful” dynamic microphone you may have used before. A tough steel grille and metal body ensure that the DR-VX1 will take the punishment of long shows and grueling tours.

- “Performance-matched” for outstanding vocal reproduction
- Roadworthy capsule design is stage proven
- Rugged steel grille and all-metal body
- Quality assurance through digital testing
- Includes professional mic clip
